HTML5, CSS3, JavaScript, jQuery,
React, Redux, Material UI,
Bootstrap, Bulma, NodeJS,
ExpressJS, Java, Groovy,
PostgreSQL, SQL, Git, Responsive
design

PROFILE

I'm an Experience Designer based in Toronto, ON. I'm passionate about designing and developing products that are scalable and enhance user satisfaction. I started my tech journey as a Software Engineer, but quickly realized that I really enjoyed using my background in Marketing and Engineering to solve problems by creating pleasant user experiences focused on human centered design. Now I'm able to use my skills to work cross-functionally and design with intent.
